

GET TO KNOW US

Cedar Creek Energy is a Minnesota-born and bred solar energy company with values that reflect those of the state we've always called home. At the same time, we are on the cutting technological, design and manufacturing edge of the fast-evolving solar power industry. This combination allows us to provide solar solutions that break even after a few years and generate income for many years down the road.

We provide all of our customers – residential and commercial – with an experienced team of engineers, innovators and financial experts who deliver outstanding residential and commercial solar energy systems and LED-lighting solutions of all shapes and sizes.

MINIMIZING ENERGY USE, REDUCING CARBON FOOTPRINTS

When you choose us, you get experts with 40-plus years' combined experience in the solar energy industry and in financing energy-efficient systems. In addition, you receive a wholehearted commitment to finding the best renewable energy solutions for your unique needs. You can count on our expertise, innovation, and ability to develop the ideal solar solution that protects your investment and maximizes your rebates and incentives.

The best way to see how a solar panel solution from Cedar Creek Energy will help reduce your electric bills is to call us or complete the on-line form:

MEET YOUR TEAM

Your team at Cedar Creek Energy understands what it takes to help you find the best solutions to minimize your energy costs and carbon footprint using the power of the sun.

CEO Rob Appelhof and VP Matt Stupnik established Cedar Creek Energy in 2007. The founding of our Coon Rapids, Minnesota, solar installation company coincided with the great recession. We understood as we witnessed how many companies in the construction industry became victim to skyrocketing energy prices. We knew that the path to sustainability would be found in renewable energy sources.

"The greatest success I have had is taking this company from an idea to a leading developer. I always want to be on the leading edge, so we can offer the best solutions to our clients."

- Rob Appelhof, CEO, Owner

In the past decade, we have designed, built and installed more than 500 successful commercial and residential solar panel installations.

MEET OUR CUSTOMERS

Residential: The Wheeler Family: The Wheeler's system went live on September 14, 2016. In the first month alone, the system produced 474 kWh and their consumption was 219 kWh.

"At first, I thought the 30% Federal Tax Credit was more of a tax deduction; as in I could deduct it on my taxes. I was thrilled to realize that the 30% was literally a tax credit. So based on the investment we made into our solar array, I received a \$15,000. So if my overall tax liability was \$30,000, minus the credit, I would only have to pay the IRS \$15,000."

Commercial: A Chance To Grow: Since A Chance to Grow had received such encouraging financing results for their energy efficient LED lighting from Cedar Creek Energy, they decided to reduce their carbon footprint even more with solar. Again, we were able to find the right solution for them.

"We were approached by other solar companies. Cedar Creek Energy was more thorough, understood the challenges of a nonprofit, and had great solutions. We went with CCE because they were the best choice."
- Bob DeBoer, A Chance to Grow
